Dear Paul,

Beyond purely industrial business matters, DIMOFAC is also committed to various social missions including promoting gender equality in manufacturing. Join the conversation during our event "[Is Industry 4.0 going to widen the Gender Gap?](#)" on 25 November.

Also in the menu of this month's newsletter, several technological updates contributing to our goal of reconfiguring production lines faster. That includes in particular monitoring and cyber-physical systems that can help guarantee optimal product quality. Read below.

Finally, take a minute to scroll down our new [homepage](#) and drop your email in the last section if you are interested in **testing our high-mix low-volume manufacturing solution** in the near future.

**Cyber-Physical****Digital****Industry 4.0**

## Systems

How do you evolve from mass-production to mass-customisation without compromising quality? This is what cyber-physical systems (CPS) ensure **through preventive maintenance and virtual simulation technology.**

→ [Read more](#)

## Instructions

How can you reduce the cost and time required to train staff and retrain seasoned workers? This is where Digital Instructions can help with devices such as **augmented reality glasses that display task descriptions and real-time status updates.**

→ [Read more](#)

## Web Café

Did you know that in the EU only 21% of scientists and engineers in manufacturing are women? Join our **second Industry 4.0 Web Café** to discuss all together solutions to fill the gender gap and see if industrial digitalisation is an opportunity.
